EDUCATION

Saveetha Engineering College

B.E. Computer Science, CGPA: 8.1/10

Chennai, India

Sep 2024 – May 2028

TECHNICAL SKILLS

Object-Oriented & Languages: Java (Object-Oriented Programming), Python, C

CS Fundamentals: Data Structures & Algorithms, OOPS, DBMS, Operating Systems, Complexity Analysis

Web Technologies: HTML, CSS, JavaScript, React

Frameworks & Tools: Spring Boot, Django, Git, GitHub, Agile/Scrum, VS Code

Databases: MySQL, SQLite

EXPERIENCE

Web Development Intern

Velandev Solutions

1 Month

- Applied object-oriented engineering principles to solve real-world backend and web application problems in a production environment, working with stakeholders to clarify feature requirements.
- Implemented features following coding standards and internal best practices, seeking feedback from senior engineers to continuously improve code quality and maintainability.
- Collaborated with a development team using Git and Agile/Scrum workflows, quickly learning new engineering methods and incorporating them into an iterative, sprint-based delivery process.

PROJECTS

BlogIt | *Spring Boot, React, MySQL, Object-Oriented Design*

- Designed and developed a full-stack, RESTful blog application with a Spring Boot backend and responsive React frontend, applying object-oriented design principles to build maintainable, scalable software.
- Built and integrated RESTful APIs for blog creation, editing, deletion, and user interactions, working through user requirements end-to-end to translate them into features.
- Architected a scalable multi-service deployment (frontend on Vercel, backend on Render, database on Railway), driving separation of concerns, reliability, and performance across services.

Kitchary | *Django, HTML, CSS, SQLite*

- Developed a full-stack restaurant and order management platform in a collaborative team environment, applying sound engineering practices to solve complex, multi-role system requirements.
- Built core backend modules including database models, business logic, and role-based access control, improving reliability and consistency of order and payment operations.
- Implemented distinct Admin, Customer, and Staff modules to manage orders and payments end-to-end, coordinating with teammates to determine feature scope.

Data Structures & Algorithms Practice | *Java, Python (LeetCode)*

- Solved 152 problems (102 Easy, 47 Medium, 3 Hard), strengthening core computer science fundamentals including data structures, algorithms, and complexity analysis.
- Applied concepts including arrays, strings, linked lists, stacks, queues, recursion, binary search, and two-pointer techniques to build efficient, well-reasoned solutions.
- Solved advanced problems such as 3Sum, Trapping Rain Water, Longest Common Subsequence, and Kth Largest Element, reinforcing sound and creative approaches to engineering problems.

CERTIFICATIONS

- Oracle Certified Professional** – Java SE 21 (Object-Oriented Programming)
- Full Stack Development** – GeeksforGeeks
- Java for Beginners** – IBM (Coursera)
- Adobe Hackathon** – Participant
- IBM Z Datathon** – Participant

RELEVANT COURSEWORK

- Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems
